📊 Projects

IDS

Host based intrusion detection software (IDS) script. Designed for the purpose of learning and demonstration at university. Simple file system protection through file/folder monitoring using built-in GNU/Linux tools and the BASH scripting language.

BitFighter,

A browser-based game made for the purpose of learning game development and game physics at university. Two players shoot at each other while dodging obstacles around the screen. Player movement involves gravity simulation.

ShopifyScrape

Using python 3, scrapy and Selenium to scrape Shopify websites for clothing data to train a machine learning model.

Discord Clone

Creating a Discord Clone for my personal portfolio using modern web tools Node.js and Angular.
